Baltimore City IT Services Company, Delmock Technologies, Inc., One of Five HUBZone Companies Selected to Present its Corporate Capabilities to the CDC.

The Center for Disease (CDC) hosted an invitation only CDC HUBZone Access Forum for five HUBZone firms, on November 30th in Atlanta GA. The purpose of the meeting was to provide these selected HUBZone companies an opportunity to share with the CDC its core capabilities, and to demonstrate how it proposed to support and advance the Center's mission.

Among those invited was Delmock Technologies Inc. (DTI), located in Baltimore MD., and represented by CEO and President, Winston DeLattiboudere, and Dr. Diane Adams, Chief Health Strategist. DTI was very well received by its CDC host, Gwendolyn Miles (Office of Small Disadvantaged Business Utilization) and by other presenters.

DTI expressed its belief that effective public health is rooted in evidence-based data, practice, and science. They also shared how it could leverage and advance three major priorities of CDC. These included: 1) improve health security at home and around the world, 2) better prevent the leading cause of illness, disability, and death; and 3) strengthen public health and healthcare collaboration.

About Delmock Technologies, Inc. (DTI)

DTI is a HUBZone, CMMI Level III award winning contractor – receiving the American Public Health Association (APHA) prestigious Community Services Award for Outstanding Service, in 2016. DTI has provided exceptional support to the federal government for over 15 years. It has garnered a reputation for efficiency, innovation and collaboration. Thus, our past performance is focused on "delivering measurable, repeatable and predictable solutions in the Federal Sector". DTI provides Program Management, Business Process, Knowledge Management, Technical Infrastructure Support, Application Development/Integration, and Cyber Security/Information Assurance services. www.delmock.com

About the Center Disease Control (CDC)

The Centers for Disease Control and Prevention (CDC) is the leading national public health institute of the United States. The CDC is a federal agency under the Department of Health and Human Services and is headquartered in Georgia.

Its main goal is to protect public health and safety through the control and prevention of disease, injury, and disability. The CDC focuses national attention on developing and applying disease control and prevention. It especially focuses its attention on infectious disease, food borne pathogens, environmental health, occupational safety and health, health promotion, injury prevention and educational activities designed to improve the health of United States citizens. In addition, the CDC researches and provides information on non-infectious diseases such as obesity and diabetes and is a founding member of the International Association of National Public Health Institutes. www.cdc.gov
