DTI's College Student Received 2018 Champion of the Year at the National HUBZone Conference

Edward Emerson was among Delmock Technologies, Inc. (DTI) second wave of Business Assistants hired from Morgan and Coppin State University. Edward started in the Recruiting Department and at one of DTI's meetings brought up the brilliant idea of starting DTI's social media platform, as a tool to recruit potential employees and in hopes of exposing the company to the Millennials. Since then the company has joined Facebook, Twitter, and LinkedIn with broad base of followers within and outside of the Science, Technology, Engineering, and Mathematics (STEM) field. Edward is the creator of DTI's Social media page, as-well-as the company's highly sought-after photographer. He is a fast paced, fluid photographer who loves capturing people in their element. Mr. Emerson loves to find genuine moments—resulting in realistic portrayals, captivating to the naked eye.

Last month, with over 300 guests (federal and private sectors) Mr. Emerson gave a stirring speech about how DTI has reinstated his hope in business and society by lending a hand-up for him to not only hone his skills in technology, but by also giving him his new-found love for photography, a second family, motivation, and money to afford college books and tuition. He called on other organizations to reach into their hearts to create programs that shadow DTI's BA program and help other students in their HUBZone communities advance to their next stage of life and become successful adults. After his Speech Michelle Burnett (Executive Director of the HUBZone Contractors National Council) surprised him with the 2018 Champion of the Year Award for all the hard-work he put into creating the NIH HUBZone Consortium Social Media pages and for taking pictures during their industry day. One picture in particular is now used on the HUBZone Contractor National Council web page.

Mr. Edward Emerson is still shocked that he received the award and told onlookers he will be forever grateful. He stated that, *"I hope my story shines a light on how other companies can take advantage and help other students. As well as, see the need for why it's important for HUBZone companies to team with their communities."* He is currently majoring in Cyber Security at Baltimore County Community College and looks forward to his graduation in the Spring of 2019.

About Delmock Technologies Inc. (DTI)

DTI is a HUBZone, CMMI-3 (Development & Services), ISO: 9001:2015, 20000-1:2011, and 27001 contractor. They have been awarded Community Services Award for Outstanding Service by American Public Health Association (APHA) and Morgan State University's Award for Research Innovation and Engagement Award. DTI has provided exceptional support to the federal government for over 16 years with a reputation for efficiency, innovation, and collaboration. www.delmock.com

About the Council

The HUBZone Council is a 501(c)(6) non-profit trade association comprised of a group of companies and organizations working together to improve and support the HUBZone program and small business community. The Council monitors public policy and promotes actions that support the well-being of the HUBZone program. In 2017, the HUBZone Council and its advocacy team played an instrumental role in achieving HUBZone Program reforms under the 2018 National Defense Authorization Act (NDAA). The changes implemented under the NDAA provided business certainty for thousands of small businesses across the nation. For more about the council visit www.hubzonecouncil.org
